

PROTECT *YOUR RV*

Keep your RV looking and feeling like new!

CR7303DB (04/18)

PLATINUM SHIELD
PROTECTION 

Your new home away from home is ready to roll, but it still has to battle the wear and tear of our harsh Canadian climate. Platinum Shield Protection will defend your RV against harsh conditions and help to keep your RV looking and feeling like new!

EXTERIOR PROTECTION

UNDERCOAT PROTECTION

RUST PROTECTION

The sun's powerful ultraviolet rays will cause your paint to fade. The finish on your RV's painted surface is uneven. These peaks and valleys trap dirt, salt, pollutants and moisture, which dulls the finish, ruins the look of your RV, and affects its resale value.

Platinum Shield Paint Protection is a long lasting sealant that bonds to the surface, completely sealing the paint. It will create a smooth, durable finish that protects your RV against fading and discoloring due to sun, tree sap, insects or bird droppings.

Canadian roads test your vehicle's undercarriage with potholes, puddles, gravel, and ice. Don't let it go unprotected.

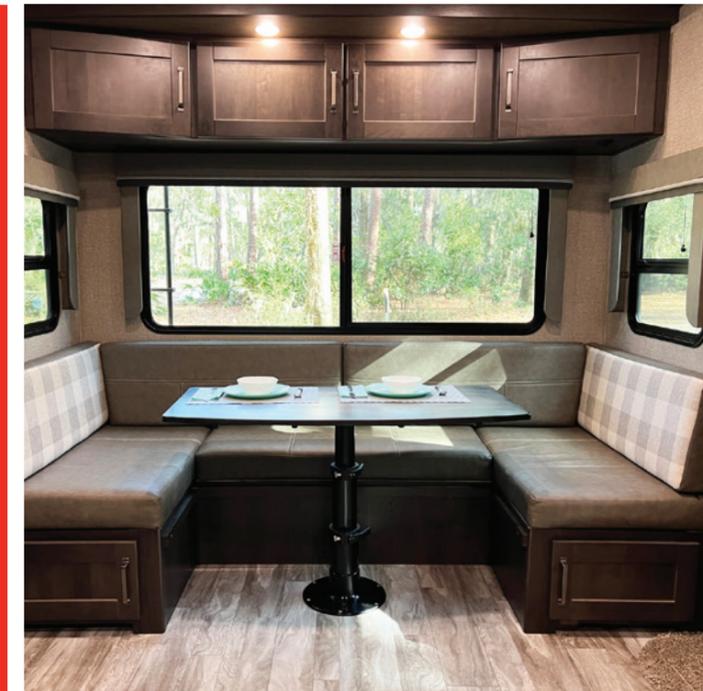

Platinum Shield Undercoat Protection is specially formulated to protect the exposed, high impact areas on the under body of your RV. It seals out moisture, protects against road debris, and provides insulation from extreme temperatures. Enjoy a more comfortable, quieter ride as the undercoating also reduces road noise.

If it's left unchecked, rust can immensely affect how your RV looks and could even shorten its overall lifespan. RV's and Trailers have many hard-to-reach crevice where dirt and grime love to collect - creating the ideal environment for rust to thrive.

The Rust Inhibitor Spray is a synthetic, waterproof product that seals the RV's inner body metal surfaces, stopping rust from the inside out. It's sprayed into the inner cavities and crevices, bonding to the metal. The high pressure spray is applied between the exterior and interior panels, ensuring that all accessible inner body panels are treated, without needing to drill any holes.

INTERIOR PROTECTION

Spills and everyday mishaps are almost unavoidable, many leaving permanent stains on your new RV's interior. Expect the unexpected and shield your RV's interior from life's little adventures.

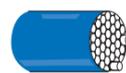

Platinum Shield Fabric Protection

is an invisible barrier that ensures easy clean-up of spills to avoid permanent staining. Penetrating each individual fiber to repel moisture and dirt. The treated interior fabric remains open and breathes, with no irregular texture, off color change or odor left behind.

UNTREATED

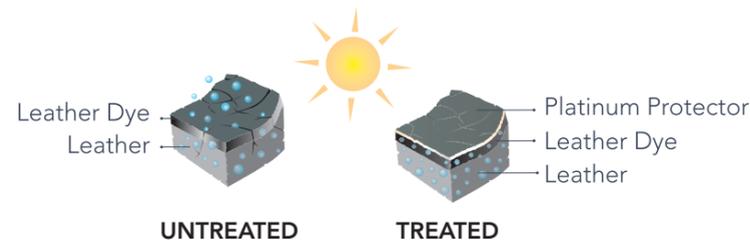

TREATED

The sun's harmful ultraviolet rays cause fading, cracking and discoloration of your RV's leather and vinyl interior.

Platinum Shield's Leather and Vinyl Protection

conditions the interior leather/vinyl, creating a barrier that locks in the essential oils and pigments. It coats the area in an ultraviolet sunscreen while still allowing the material to breathe. A dashboard coated in its treatment receives a flat satin finish that eliminates glare and reduces dust.
